Now with Enhanced GPS Function
and internal re-chargeable battery pack

12 Month Product Guarantee

"Phone It and Find It"

The Textlink GPS Phone Textracker is the ultimate black box security and tracking solution for protecting any type of vehicle. Real time GPS fixes, Latitude & Longitude of the vehicles exact position are transmitted on request to any mobile phone. The co-ordinates can then be entered into our FREE web map service or into any computer mapping software to view the exact location of the vehicle, trailer, boat, plant, asset, etc.....

"Phone your vehicle and find out where it is."

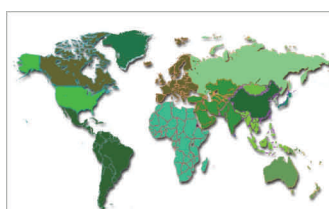

The only cost is the price of a mobile text message.

- **NO Hidden Charges**
- **NO Monthly Subscriptions**
- **NO Registration Fees**
- **NO Contracts to Pay**

Security Features:

- For plant, caravans, trailers, boats, cars, vans, etc, that have no alarm security system, the Textracker comes with a built in Geo-Fence alarm system which will secure a "safe zone", perimeter around the vehicle. When the vehicle is then moved outside the set safe zone area an alarm warning text message will be transmitted to the users mobile phone.
- Phone the vehicle at anytime and find out exactly where it is, pinpoint accuracy to within 2 meters. Compact in size, only 12cm x 7cm. The GPS Textracker can operate from its own batteries or can be connected to the vehicles battery.

FREE On-Line Web Maps

Caravans, Boats, Excavators
Vans, Cars, Trailers, Tractors
Bikes, Containers, Plant, Etc.

Works with any mobile phone
and any PAYG or Contract Sim

**Send a text message and immobilise your vehicle.
You can even find your vehicle when it is inside a building.**

 Battery Re-charge: 40 Hrs full capacity

GPS Receiver: Channels: 12 parallel
 Accuracy: 2 Meters
 Networks: GSM/SMS/850/900/1800
 Supported: Any mobile network
 Manufacturing: BS EN ISO 9001:2000
 Ext Antenna: 30mm x 35mm x 10mm
 Conforms to: CE marked

The GPS Phone Textracker gets it exact geographical position from a series of 24 geosynchronous satellites that continuously transmit its position to within 2 metres. When the user phones the Textracker the positional information is then transmitted over the GSM network to the users mobile phone in the form of a text message. Simply enter the co-ordinates into the FREE on-line web maps and find your asset

The GPS Textracker can be setup to operate in various modes of operation and is programmed by simply sending it text messages from a mobile phone. There is an output wire available that when connected via a relay (not supplied) to the existing car alarm or to an immobiliser, the user can send a text message and switch on their car alarm or immobilise their vehicle. For covert operations and when operating the Textracker from its own internal battery pack, the user can put the Textracker into a sleep mode this will ensure maximum battery life of up to 10 days.

The GPS Textracker has an input which can be used to connect to an existing security alarm system or for example a panic button. In the event of the alarm being triggered or the panic button being pressed an instant text warning message will be transmitted to the users mobile phone **"Warning Alarm Activated"**. An ideal safety solution if you are lost or in any form of distress.

The GPS Textracker with its built in Geo-Fence Alarm feature makes it the ideal solution for any type of vehicle that has no existing alarm system fitted. The user by sending a simple text message from their mobile phone can enable the Geo-Fencing alarm function which will put a radius selectable up to 10,000 metres around the perimeter of the vehicle and in the event that it is moved outside the selected range an instant text warning message will be transmitted to the users mobile phone **"Warning Geo-Fence Activated"**.

The GPS Textracker has a rechargeable, internally fitted battery pack, which that when fully charged will last for up to 10 days without any external power source.

The Textracker can be supplied with or without a Sim card fitted and with £10 of credit.

For covert fitting applications there is an option available to purchase the Textracker with an internally fitted GPS antenna or an external small magnetic mount GPS antenna.

The Textracker operates from any PAYG or contract type Sim card and is one of the most flexible, accurate and competitive GPS security and tracking systems on the market today.
