

The MapPoint Textracker

“Real Time Vehicle Tracking System”

Designed and Manufactured in the UK by Textlink Ltd. www.text-link.co.uk

£299

Vehicle Satellite GPS Tracking System
Communicates directly with your home PC

Textracker™
The Smart way to monitor & track your vehicle

The MapPoint Textracker **£9.99 pm**

The amazing MapPoint Textracker is a low cost fleet security and vehicle tracking system for the monitoring of vehicles and drivers constantly on the road. Real “LIVE” information of the vehicles GPS position, direction, speed and street address are plotted directly onto the street level maps on the users computer or laptop. Tracks vehicles throughout Europe and the UK.

MapPoint Textracker Features:

- “Live” Vehicle tracking, directly to the PC maps with GPS updates every 5 Seconds.
- Displays vehicles Time, Date, Speed, Direction & Exact street address information.
- Unlimited usage 24/7/365 with unlimited updates for a fixed monthly fee of - **£9.99**
- Edit, Print or Save daily vehicle summary reports in Microsoft Word.
- Watch and track ALL your vehicles on the map at the same time.
- Constantly stores and updates information every minute the vehicle is moving.
- Completely portable and can be transferred from vehicle to vehicle.
- Plot where the vehicle was idle or over the speed limit.
- Stores and saves the vehicles history and past journies indefinitely.

“WGY Group have installed the MapPoint Textracker security and tracking system in their brand new fleet of state-of-the-art vehicles for their European haulage business.

Owner - Wayne Gardner-Young said “We can monitor all our vehicles and drivers constantly on the road, to and from there European destinations, directly from our office PC. Security, insurance reduction and production efficiency are just a few of the real benefits we are already experiencing. A high tech, low cost and very smart vehicle tracking system. A market winner.”

The New and Smart Way to Track Your Vehicles

Dimensions:	117mm x 69mmx 25mm	GPS Receiver:	Channels: 12 parallel
Weight:	10 oz	Accuracy:	2 Meters
Operating Temp:	-30 deg to +70 deg C	Networks:.	GSM/SMS/850/900/1800
Power Requirements:	9v to 36v - 12 V Nom	Approved:	T-Mobile / 02 / Vodafone
Current Draw:	6mA stand by - 40mA Nom	Manufacturing:	BS EN ISO 9001:2000
Battery Back-up:	7 Days without power	Ext Antenna:	42mm x 50mm x 13mm
Battery Re-charge:	40 Hrs full capacity	Conforms to:	CE marked

The MapPoint Textracker pinpoints its geographical position to within 2 metres from a series of 24 geosynchronous satellites that continuously orbit the Earth. The information from the Textracker installed in the vehicle is stored every minute and then transmitted over the network directly to the street level maps on the users computer, displaying the date, time, speed, direction and street address information of the vehicle. The system works in conjunction with Microsoft MapPoint mapping software, versions 2002, 2004 or 2006.

The 60 day latest evaluation version of the mapping software is supplied **FREE** with the purchase of a MapPoint Textracker.
